

Spring-loaded, long-travel arm

Task Description: [Attaching clusters \(claws?\)](#)

Comments of the employee:

✓

Comments of the employer: motivation regarding solution:

MSD risks:

Exposed areas:

Solutions:

- The spring-loaded, long-travel arm carries the weight of the cluster so the milker has to perform only the precision task of putting the teat cups on the teats. (In this parlour it was not necessary to release the cluster.)
