

Power driven manure slide

Task Description: **Cleaning parlour**

After or during the milking process the floor has to be cleaned. This regular cleaning is traditionally done with a squeegee.

Comments of the employee:

- ❑ 'Continuously repetition of the same gestures'
- ❑ 'Work height not in accordance with work posture: short handle'

Comments of the employer:

- ❑ This task is normally done twice a day and lasts 10 minutes. Once a week the parlour is cleaned more thoroughly.

MSD risks:

- ❑ Posture

Exposed areas:

- ❑ Neck/shoulder
- ❑ Arm/wrist
- ❑ Lower back

Solutions:

- ❑ The manure can be cleaned by a power driven manure slide
