

Tractor wheels for redistributing fodder

Task Description: **Redistributing the fodder**

The fodder is distributed a first time with a feeder mixture wagon. The cows will not be able to reach all the fodder, so the last part has to be redistributed. Often this is done manually with a shovel.

Comments of the employee:

- 'Work height not in accordance with work posture'
- 'Loads too heavy, carrying distance too far, too low, ...'

MSD risks:

- Posture

Exposed areas:

- Arm/wrist
- Lower back

Solutions:

- One or two tractor wheels are attached horizontally to a tractor or bulldozer to distribute the fodder. When the wheels touch the ground, they rotate. With two wheels both sides of the aisle can be done simultaneously.
